Taunton River Watershed Management Plan

Innovative Approaches to Watershed Protection and Restoration

**May 12, 7-9 pm
Lakeville Public Library
4 Precinct Street
Lakeville, MA**

Help us Identify Candidate Demonstration Projects Throughout the Watershed

A watershed management plan for the Taunton River Watershed is underway and we are looking for your input! Come learn about the innovative planning work that has been done to date (Phase I), and to hear about the exciting opportunities for demonstration projects throughout the watershed in the coming year (Phase II).

The Horsley Witten Group, with funding from the Commonwealth of Massachusetts, is working with a Steering Committee of Bridgewater State College, several regional and state agencies, and The Nature Conservancy to develop this watershed plan. Currently, we are actively working to identify potential demonstration projects in the watershed in the areas of low impact development, alternative wastewater management, and habitat restoration or protection. In addition, we will be selecting two communities to team with our project to work through a code reform project to facilitate techniques such as LID, alternative wastewater management options, and improved habitat protection.

Bioretention system to treat parking lot runoff.

Please join us to learn more, and bring your project ideas!

Public Welcome! Light refreshments will be served.
